Trademarks

The following are trademarks of the International Business Machines Corporation in the United States, other countries, or both.

Not all common law marks used by IBM are listed on this page. Failure of a mark to appear does not mean that IBM does not use the mark nor does it mean that the product is not actively marketed or is not significant within its relevant market.

Those trademarks followed by ® are registered trademarks of IBM in the United States; all others are trademarks or common law marks of IBM in the United States.

For a more complete list of IBM Trademarks, see www.ibm.com/legal/copytrade.shtml:

*BladeCenter®, CICS®, DataPower®, DB2®, e business(logo)®, ESCON, eServer, FICON®, IBM®, IBM (logo)®, IMS, MVS, OS/390®, POWER6®, POWER6+, POWER7®, Power Architecture®, PowerVM®, PureFlex, PureSystems, S/390®, ServerProven®, Sysplex Timer®, System p®, System p5, System x®, z Systems®, System z9®, System z10®, WebSphere®, X-Architecture®, z13™, z13s™, z14™, z Systems™, z9®, z10, z/Architecture®, z/OS®, z/VM®, z/VSE®, zEnterprise®, zSeries®, IBM Z®

The following are trademarks or registered trademarks of other companies.

Adobe, the Adobe logo, PostScript, and the PostScript logo are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States, and/or other countries. Cell Broadband Engine is a trademark of Sony Computer Entertainment, Inc. in the United States, other countries, or both and is used under license therefrom.

Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.

Microsoft, Windows, Windows NT, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both.

Intel, Intel logo, Intel Inside, Intel Inside logo, Intel Centrino, Intel Centrino logo, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

ITIL is a registered trademark, and a registered community trademark of the Office of Government Commerce, and is registered in the U.S. Patent and Trademark Office.

IT Infrastructure Library is a registered trademark of the Central Computer and Telecommunications Agency, which is now part of the Office of Government Commerce.

* All other products may be trademarks or registered trademarks of their respective companies.

Notes:

Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.

IBM hardware products are manufactured Sync new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.

This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Information about non-IBM products is obtained Sync the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.

RMF XML Toolkit for Windows

The RMF XML Toolkit helps you to browse the RMF Postprocessor reports in XML format with your internet browser as an HTML document, using the RMF XSL stylesheet. Download the RMF Postprocessor reports in XML format into the RMF XML Toolkit installation directory.

The required XSL stylesheet files are available in a subdirectory of the RMF XML Toolkit. Then open the RMF Postprocessor reports in XML format in the RMF XML Toolkit installation directory with your internet browser, and the RMF XSL stylesheet transforms the report into an HTML document.

Ensure to download the RMF Postprocessor reports in XML format in ASCII mode to the RMF XML Toolkit installation directory.

Environments tested by IBM for processing RMF Reports in XML format using RMF XSL style sheets:

Internet Explorer 11 and Document Mode Edge

Firefox Version 38.0.1 ESR

Remark: In Windows Internet Explorer a user can select the browser mode and document mode by using the Developer Tools (F12 or using the menu bar) in Windows Internet Explorer.

RMF XML Toolkit for Windows (cont)

Tip: Check the example subdirectory of the RMF XML Toolkit. There you find more information on how to exploit RMF Postprocessor XML reports. You also find an example for an RMF Postprocessor realtime reporting setup with sysplex wide scope.

License: The IBM RMF XML Toolkit is licensed to you under the terms of your license(s) to use z/OS (for example, the IBM Customer Agreement, IBM International Customer Agreement or equivalent agreement between you and IBM) and is subject to your valid authorization from IBM to z/OS and the optional priced feature of z/OS called the Resource Measurement Facility (RMF). In the event that your license to z/OS or RMF terminates, your authorization to IBM RMF XML Toolkit shall terminate.

Download erbxmikt.msi from : <ftp://public.dhe.ibm.com/eserver/zseries/zos/rmf/>

RMF Spreadsheet Reporter for Windows

The RMF Spreadsheet Reporter is the powerful workstation solution for graphical presentation of RMF Postprocessor data. Use it to convert your RMF data to spreadsheet format and generate representative charts for all performance relevant areas.

With the new Spreadsheet Reporter version, you can create graphical charts from raw SMF data in one single step. You can directly start the RMF provided spreadsheet macros from the Spreadsheet Reporter main window.

License: The IBM RMF Spreadsheet Reporter Java TM Technology Edition tool is licensed to you under the terms of your license(s) to use z/OS (for example, the IBM Customer Agreement, IBM International Customer Agreement or equivalent agreement between you and IBM) and is subject to your valid authorization from IBM to z/OS and the optional priced feature of z/OS called the Resource Measurement Facility (RMF). In the event that your license to z/OS or RMF terminates, your authorization to IBM RMF Spreadsheet Reporter Java TM Technology Edition tool shall terminate.

Download rmfsrv5.msi from : <ftp://public.dhe.ibm.com/eserver/zseries/zos/rmf/>

RMF PM Java Technology Edition

Abstract: RMF PM Java Technology Edition is a graphical platform-independent enhancement for RMF online monitoring that allows you to analyze RMF Monitor III data right from your workstation.

RMF PM takes its input data from a single data server on one system in the sysplex, which gathers the data from the RMF Monitor III on each MVS image. Therefore, this is called the Distributed Data Server (DDS). You can analyze and monitor data from the present or the recent past.

License: The IBM RMF PM Java TM Technology Edition tool is licensed to you under the terms of your license(s) to use z/OS (for example, the IBM Customer Agreement, IBM International Customer Agreement or equivalent agreement between you and IBM) and is subject to your valid authorization from IBM to z/OS and the optional priced feature of z/OS called the Resource Measurement Facility (RMF). In the event that your license to z/OS or RMF terminates, your authorization to IBM RMF PM Java TM Technology Edition tool shall terminate.

Download gpmwinv2.msi from : <ftp://public.dhe.ibm.com/eserver/zseries/zos/rmf/>

Download and installation

Download

If you have trouble downloading the files with a browser, you can do a native logon to the server via FTP:

1. ftp to "public.dhe.ibm.com"
2. Log on as "anonymous"
3. Enter your e-mail address for the password, for example, "userid@provider.com".
4. Change to the RMF directory using the "cd" command:
5. cd eserver/zseries/zos/rmf
6. Use the "binary" command to set the download option for the file.
7. Use the "get" or "mget" command to retrieve the files. Remember that file names are case sensitive.
8. Use "quit" to quit.

Installation

All tools are shipped as Windows Installer MSI packages. After downloading the file double click on its icon in the Windows File Manager or Explorer window and the interactive installation will start.
